

Chapter 17

Our Environment

Definition: Everything around us is our environment.

Components:

Living Things (Biotic)

People, plants,
animals, birds.

Non-Living Things (Abiotic)

Sunlight, air, water, land,
buildings, vehicles.

Important (Marathi): Environment means everything around us → पर्यावरण म्हणजे आपल्या सभोवतालचा परिसर.

What is Pollution?

The dirtying of the environment by adding harmful substances.

Pollutants : The harmful substances that make the environment dirty.

Types of Pollution

1. Air Pollution
2. Water Pollution
3. Noise Pollution
4. Land Pollution

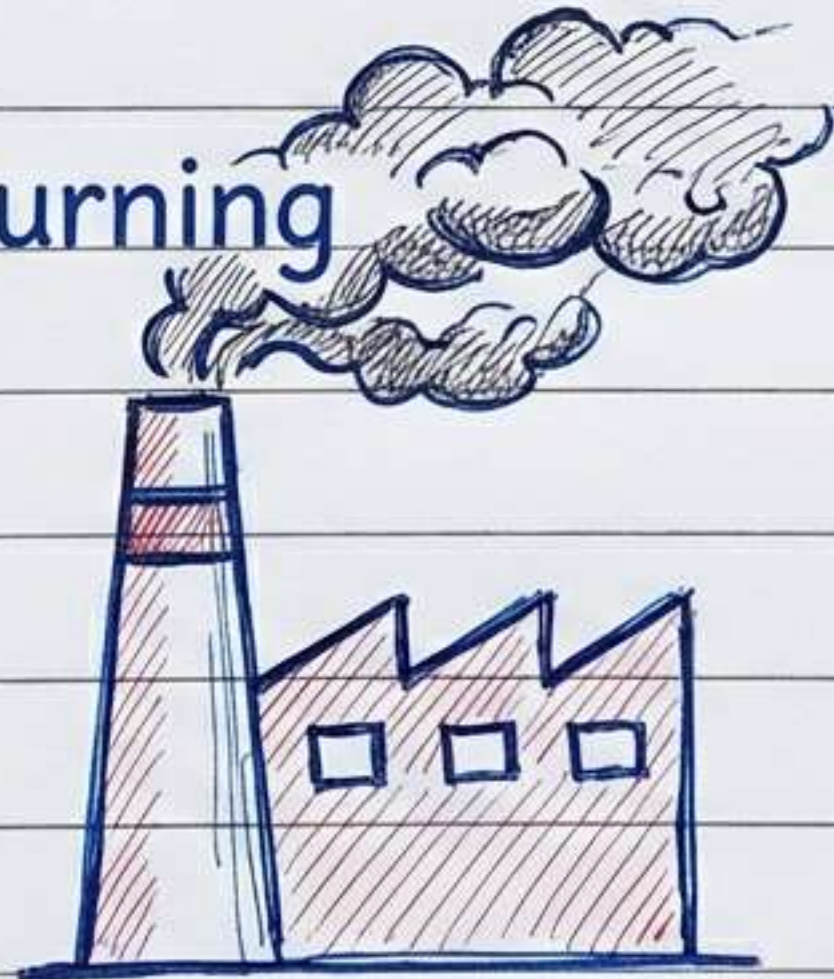

Important (Marathi) : Pollution is harmful to nature
→ प्रदूषण म्हणजे पर्यावरणाचे नुकसान करणारे घटक.

1. Air Pollution (The Problem)

Contamination of air by means of various pollutants.
Living things need clean air to breathe!

Causes (Why it happens)

- Smoke from vehicles and factories.
- Smoke from burning wood, plastic, and garbage.
- Bursting of firecrackers.

Effects (What happens to us)

- Irritation in eyes, nose, and throat.
- Diseases like **Asthma**, headache, and allergy.

Exam Tip
Clean air =
Healthy life!

Saving Our Air (Remedies)

Steps to Fix:

- ☐ Reduce cutting of trees.
- ☐ Do **NOT burn** dry leaves, garbage, or plastic.
- ☐ Plant more trees.
- ☐ Use public transport for long distances.
- ☐ Walk or cycle for short distances.
- ☐ Avoid bursting firecrackers.

Important (Marathi): Trees help clean the air
→ झाडे हवा स्वच्छ ठेवण्यास मदत करतात.

2. Water Pollution (The Problem)

Fact: Rain is the main source of water on Earth!

Polluting fresh water (rivers, lakes, ponds) by dumping pollutants.

Causes (Why it happens)

- Throwing garbage or factory waste in water bodies.
- Washing clothes or bathing animals in ponds/lakes.

Effects (What happens to us)

- Harms plants and animals in water.
- Drinking polluted water causes diseases: **Diarrhoea, Cholera, Typhoid, Jaundice.**

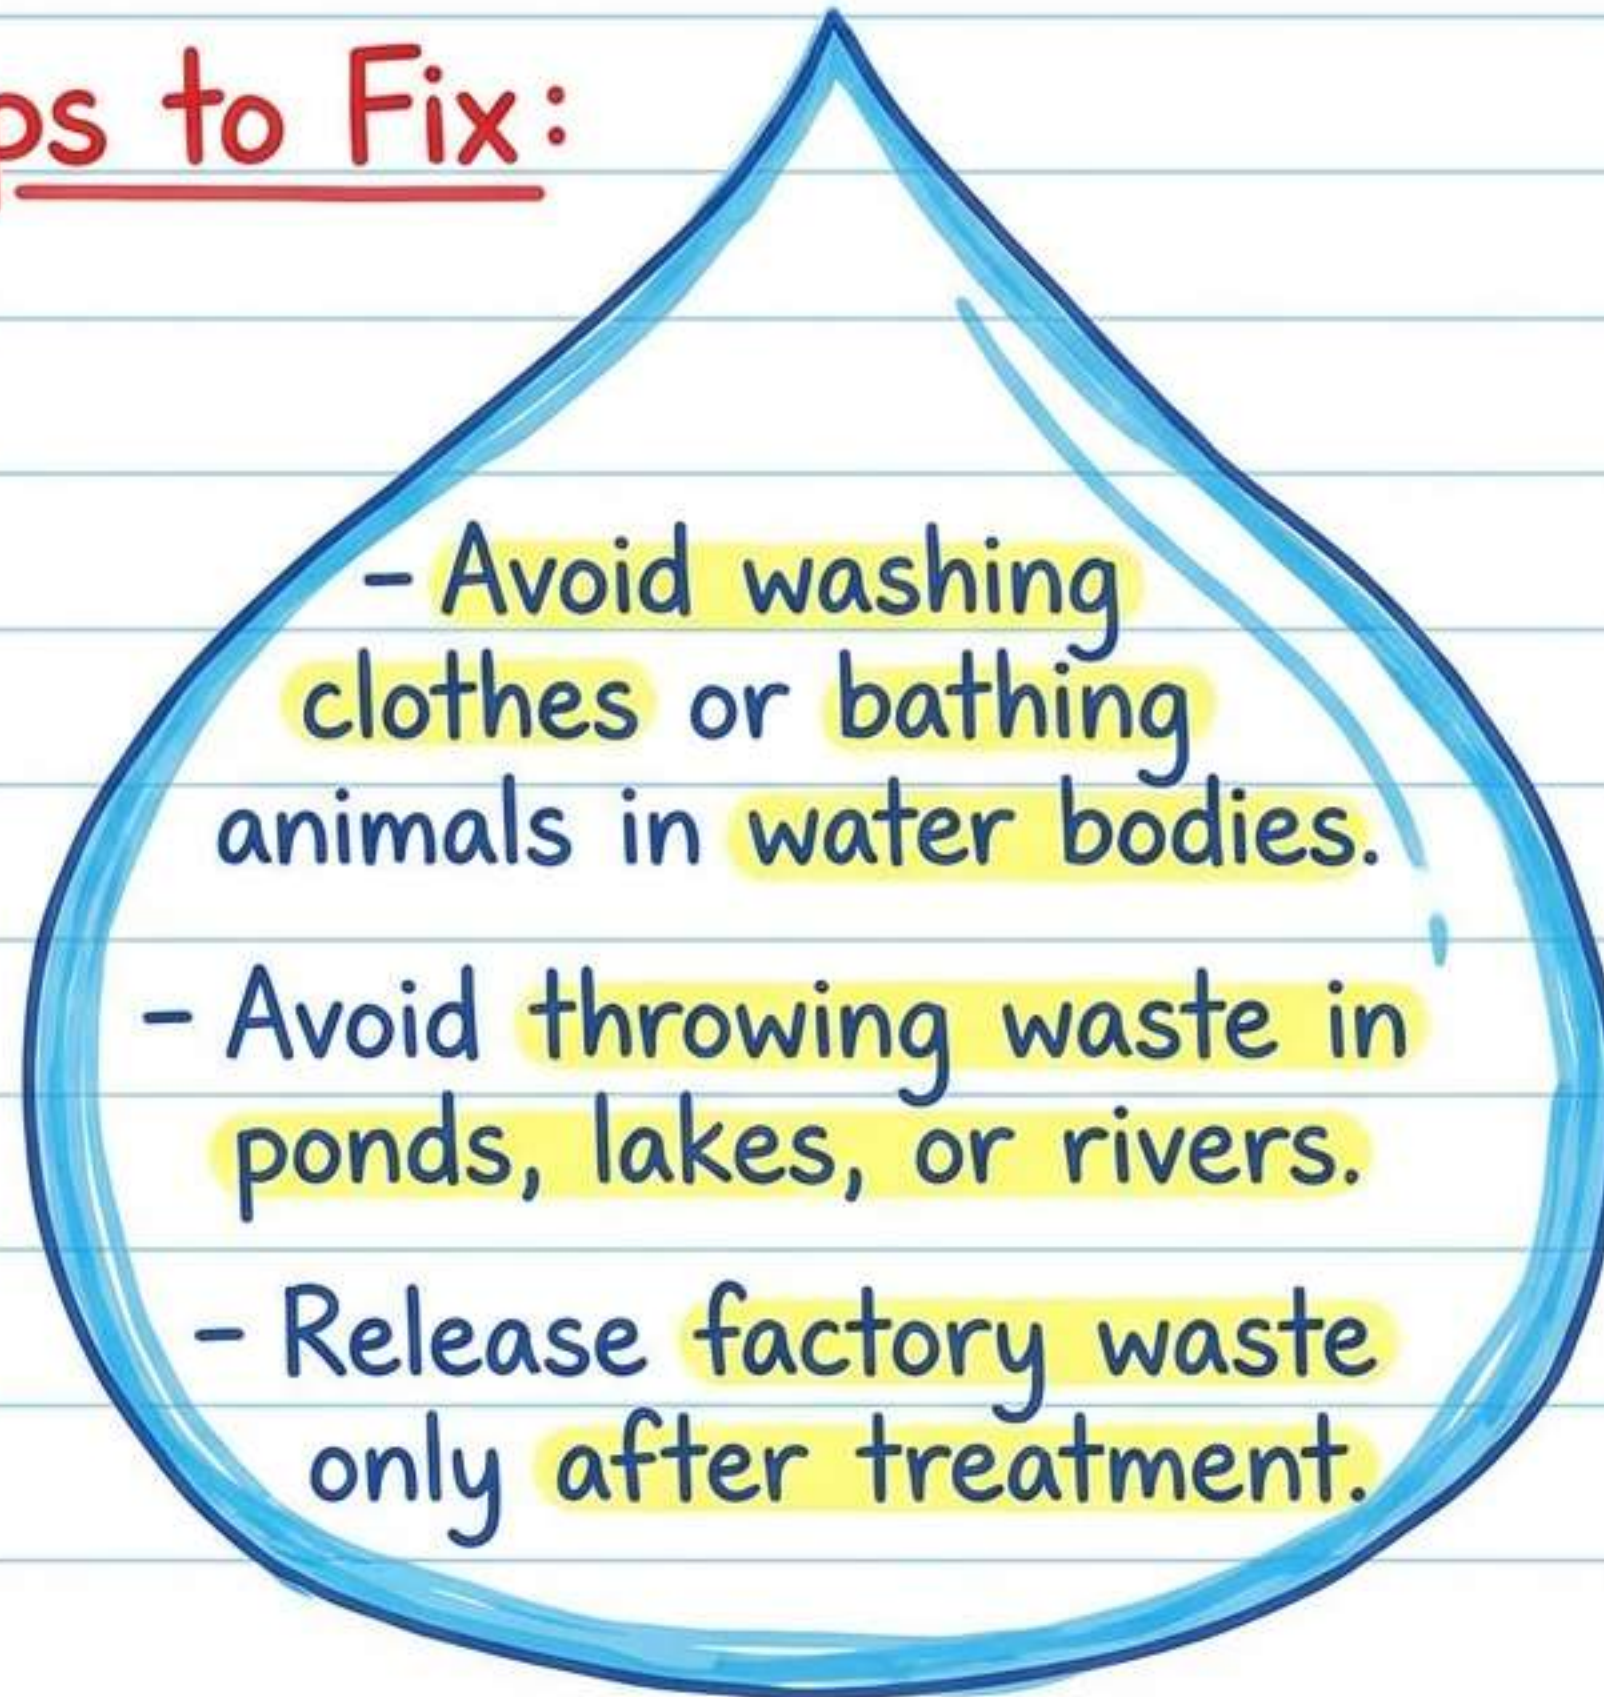

Glossary: Dumping = Throwing away.

Important: Dirty water causes diseases → दूषित पाण्यामुळे कॉलरा आणि टायफॉइडसारखे आजार होतात.

Protecting Our Water (Remedies)

Steps to Fix:

- Avoid washing clothes or bathing animals in water bodies.

- Avoid throwing waste in ponds, lakes, or rivers.

- Release factory waste only after treatment.

3. Noise Pollution

Unpleasant, loud sound around us is called noise.

Causes	Effects	Remedies
- Honking horns, Vehicle sounds, - Crackers, - Loudspeakers, - Loud TV/Radio, - Factory machines.	- Headache, - Disturbance while sleeping, - Loss of hearing.	- Avoid honking, - Play music low, - No crackers.

Important: Loud noise hurts our ears → खूप जोरात आवाजामुळे कानांना त्रास होतो.

4. Land Pollution (The Problem)

Contamination of land by dumping pollutants.

Causes

- Throwing household waste/garbage in the open.
- Dumping waste by hospitals and factories.
- Excessive use of Pesticides & Fertilisers in fields.

Effects

- Dirty surroundings attract rats, cockroaches, and flies.
- Causes diseases like Cholera and Typhoid.

Important: Dirty land spreads diseases → जमिनीवर कचरा टाकल्याने रोगराई पसरते.

Saving Our Land (Remedies)

Steps to Fix:

- Do not throw waste in the open.
- Avoid plastics & polythene bags.
- Use Cloth or Jute bags.
- Use natural manures in fields.

Plastic
Bag

Cloth
Bag

Glossary

Pesticides: Substances sprayed to kill insects that eat crops.

The Three R's (Saving Environment)

1. **Reduce:** Try to reduce waste.

2. **Reuse:** Use things again.

3. **Recycle:** Make new things using waste products.

Everyday Life Trick

Take a used plastic bottle. Stuff small plastic bags inside it. When full, give it to the garbage collector!

Important: Reduce, Reuse, Recycle → कचरा कमी करा, पुन्हा वापरा, पुनर्प्रक्रिया करा.

My Promise to Environment

I Promise To...

- ☒ 1. I will NOT burn crackers.
- ☒ 2. I will plant more trees.
- ☒ 3. I will use paper, cloth, or jute bags.
- ☒ 4. I will save water and electricity.
- ☒ 5. I will not waste paper.

? Knowledge Check (Odd One Out)

Find the odd one and circle it!

1. Smoke, Plastic, Garbage, **Trees** (Trees are living)

2. Jute, Cloth, **Plastic**, Paper (Plastic is harmful)

3. Man, **Car**, Dog, Girl (Car is non-living)

(Smoke is a pollutant) ?

4. **Smoke**, Air, Water, Land

Exam Tip:
Read carefully!

Memory Tricks (Mnemonics)

Trick 1: Pollution Types → Remember L.A.W.N.

L - Land

A - Air

W - Water

N - Noise

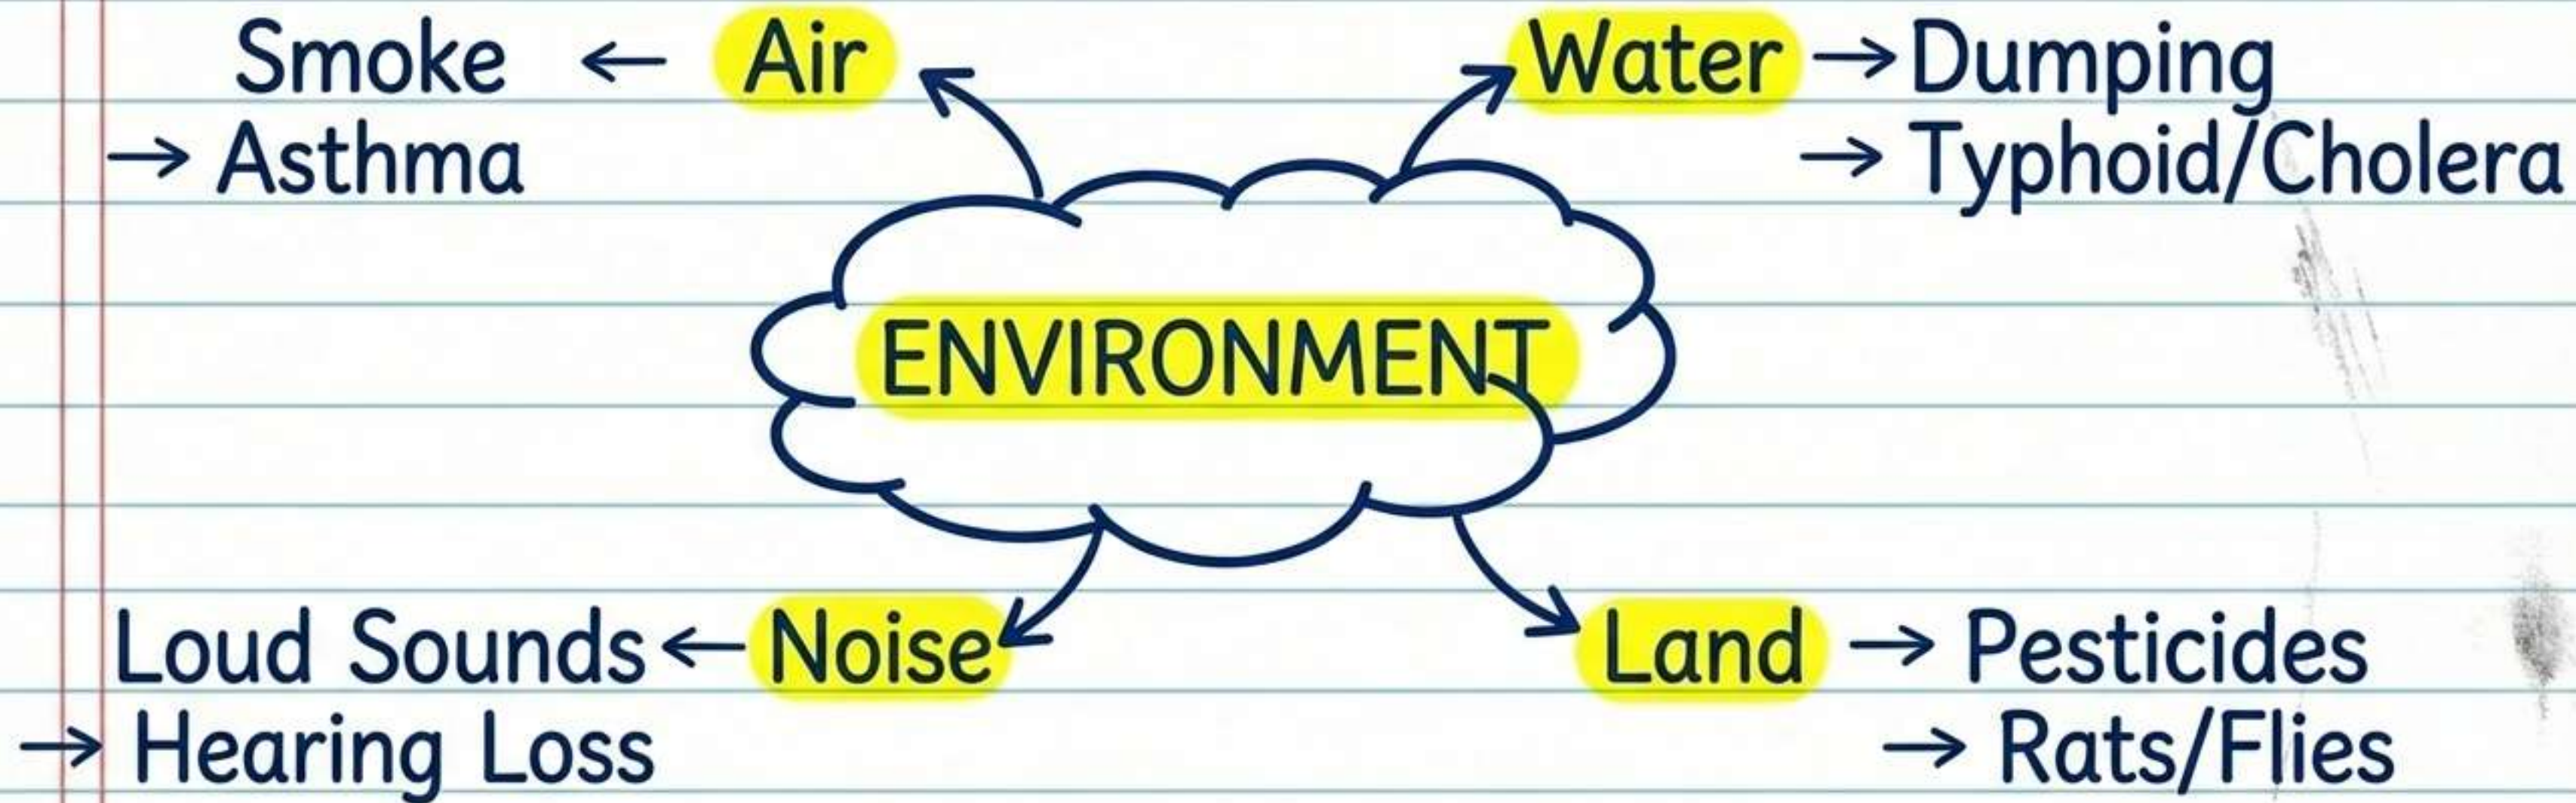

Trick 2 : Water Diseases → Remember CDT

C - Cholera
D - Diarrhoea
T - Typhoid

Trick 3 : The 3 Green Friends → Reduce, Reuse, Recycle.

Master Recap (One Page Summary)

SOLUTION

The 3 R's + Plant Trees + No Plastic

Final Exam Note

Remember Definitions:

- Pollutants: The "Villains" (Harmful substances).
- Dumping: Throwing away.
- Headache: Pain in the head.

Heroes

Enemy

Plastic
Bag

Let's keep Earth clean → चला, आपली पृथ्वी स्वच्छ ठेवूया!

Best
of
Luck
