

CHAPTER 9: BOOND - TO THE MOUNTAINS & BACK

Topic: Sources of Water & The Water Cycle

- Lake (Talav - तलाव)
- Well (Vihir - विहीर)
- Pond (Tale - तळे)
- River (Nadi - नदी)
- Tank (Taki - टाकी)
- Sea (Samudra - समुद्र)

Important: Water comes to our taps from these sources!

PART 1: THE HEAT (EVAPORATION)

Boond (Raindrop) was playing with her friend Sagar (The Ocean).

Exam Tip:

Sun =
Energy
Source!

As the Sun rose higher → It got HOT.

Boond felt 'Exhausted' (Very ~~Wired~~ tired).

Marathi:
Waaf (वाफ)
= Vapor

When water gets hot, it turns into Vapor (Gas). This is called Evaporation.

Waaf (वाफ) = Vapor

PART 2: GOING UP (CONDENSATION)

Boond met **Badal** (The Cloud).

Badal invited Boond to come up.

Why? "It is quite well and **much cooler** here."

Hot air rises. As vapor goes up,
it cools down and turns back into
tiny water droplets → Forms Clouds.

This is **Condensation**.

Remember: Clouds are Cool (Condensation).

Quite = A fair amount.

PART 3: THE JOURNEY (TRANSPORTATION)

Boond and Badal became friends.

They traveled together across the sky for a few days.

Destination: They headed toward the Mountains.

Mountains = Dongar / Parbat
(डोंगर / पर्वत)

Note: Clouds don't stay in one place. Wind moves them!

Paas (पास) = Rain

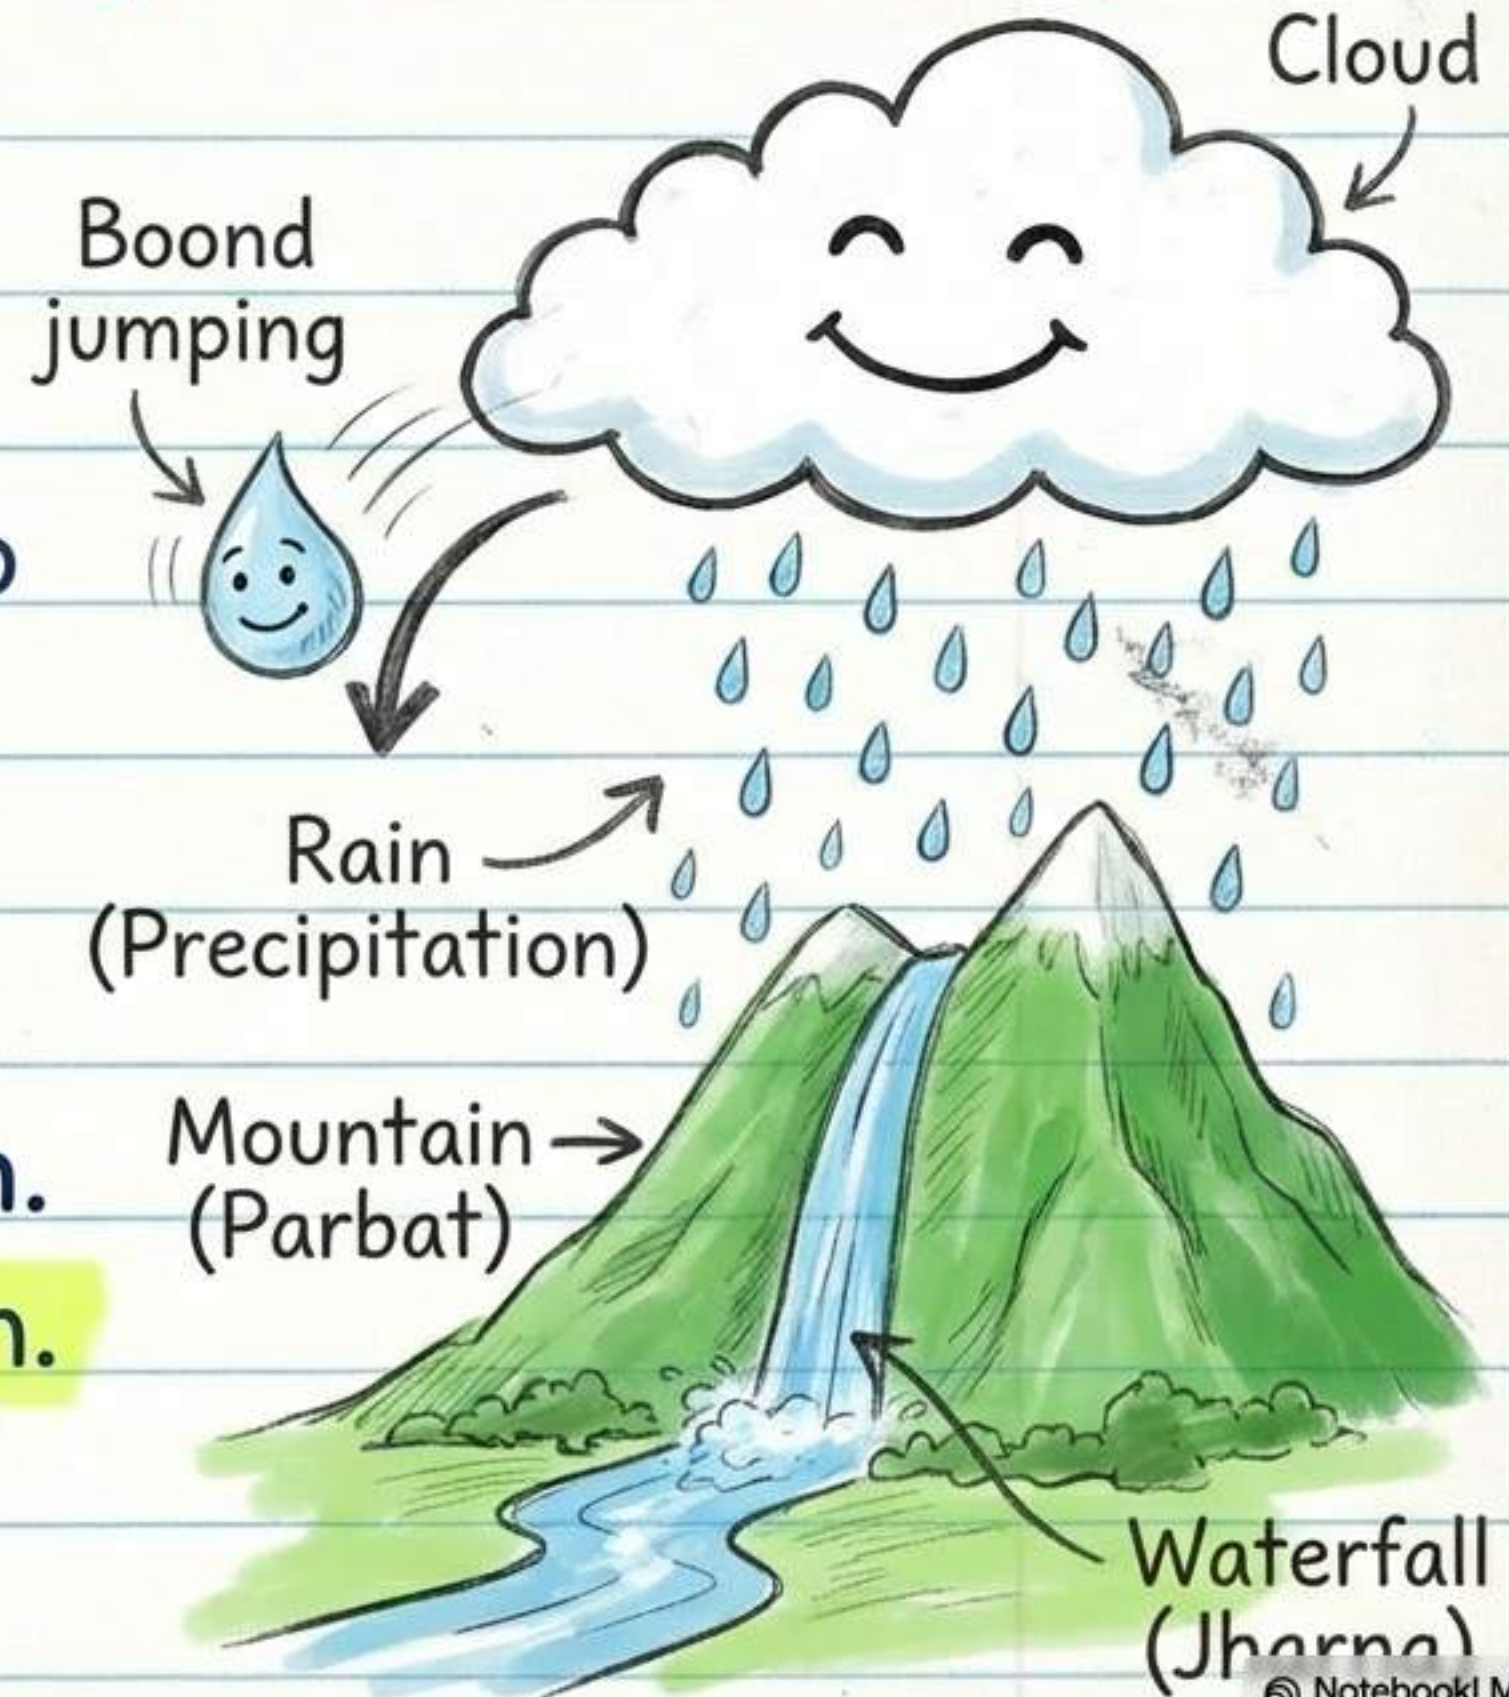

PART 4: COMING DOWN (PRECIPITATION)

Boond saw her old friends:

1. Parbat (The Mountain)
2. Jharna (The Waterfall)

→ Action: Boond said 'Bye' to Badal and jumped down.

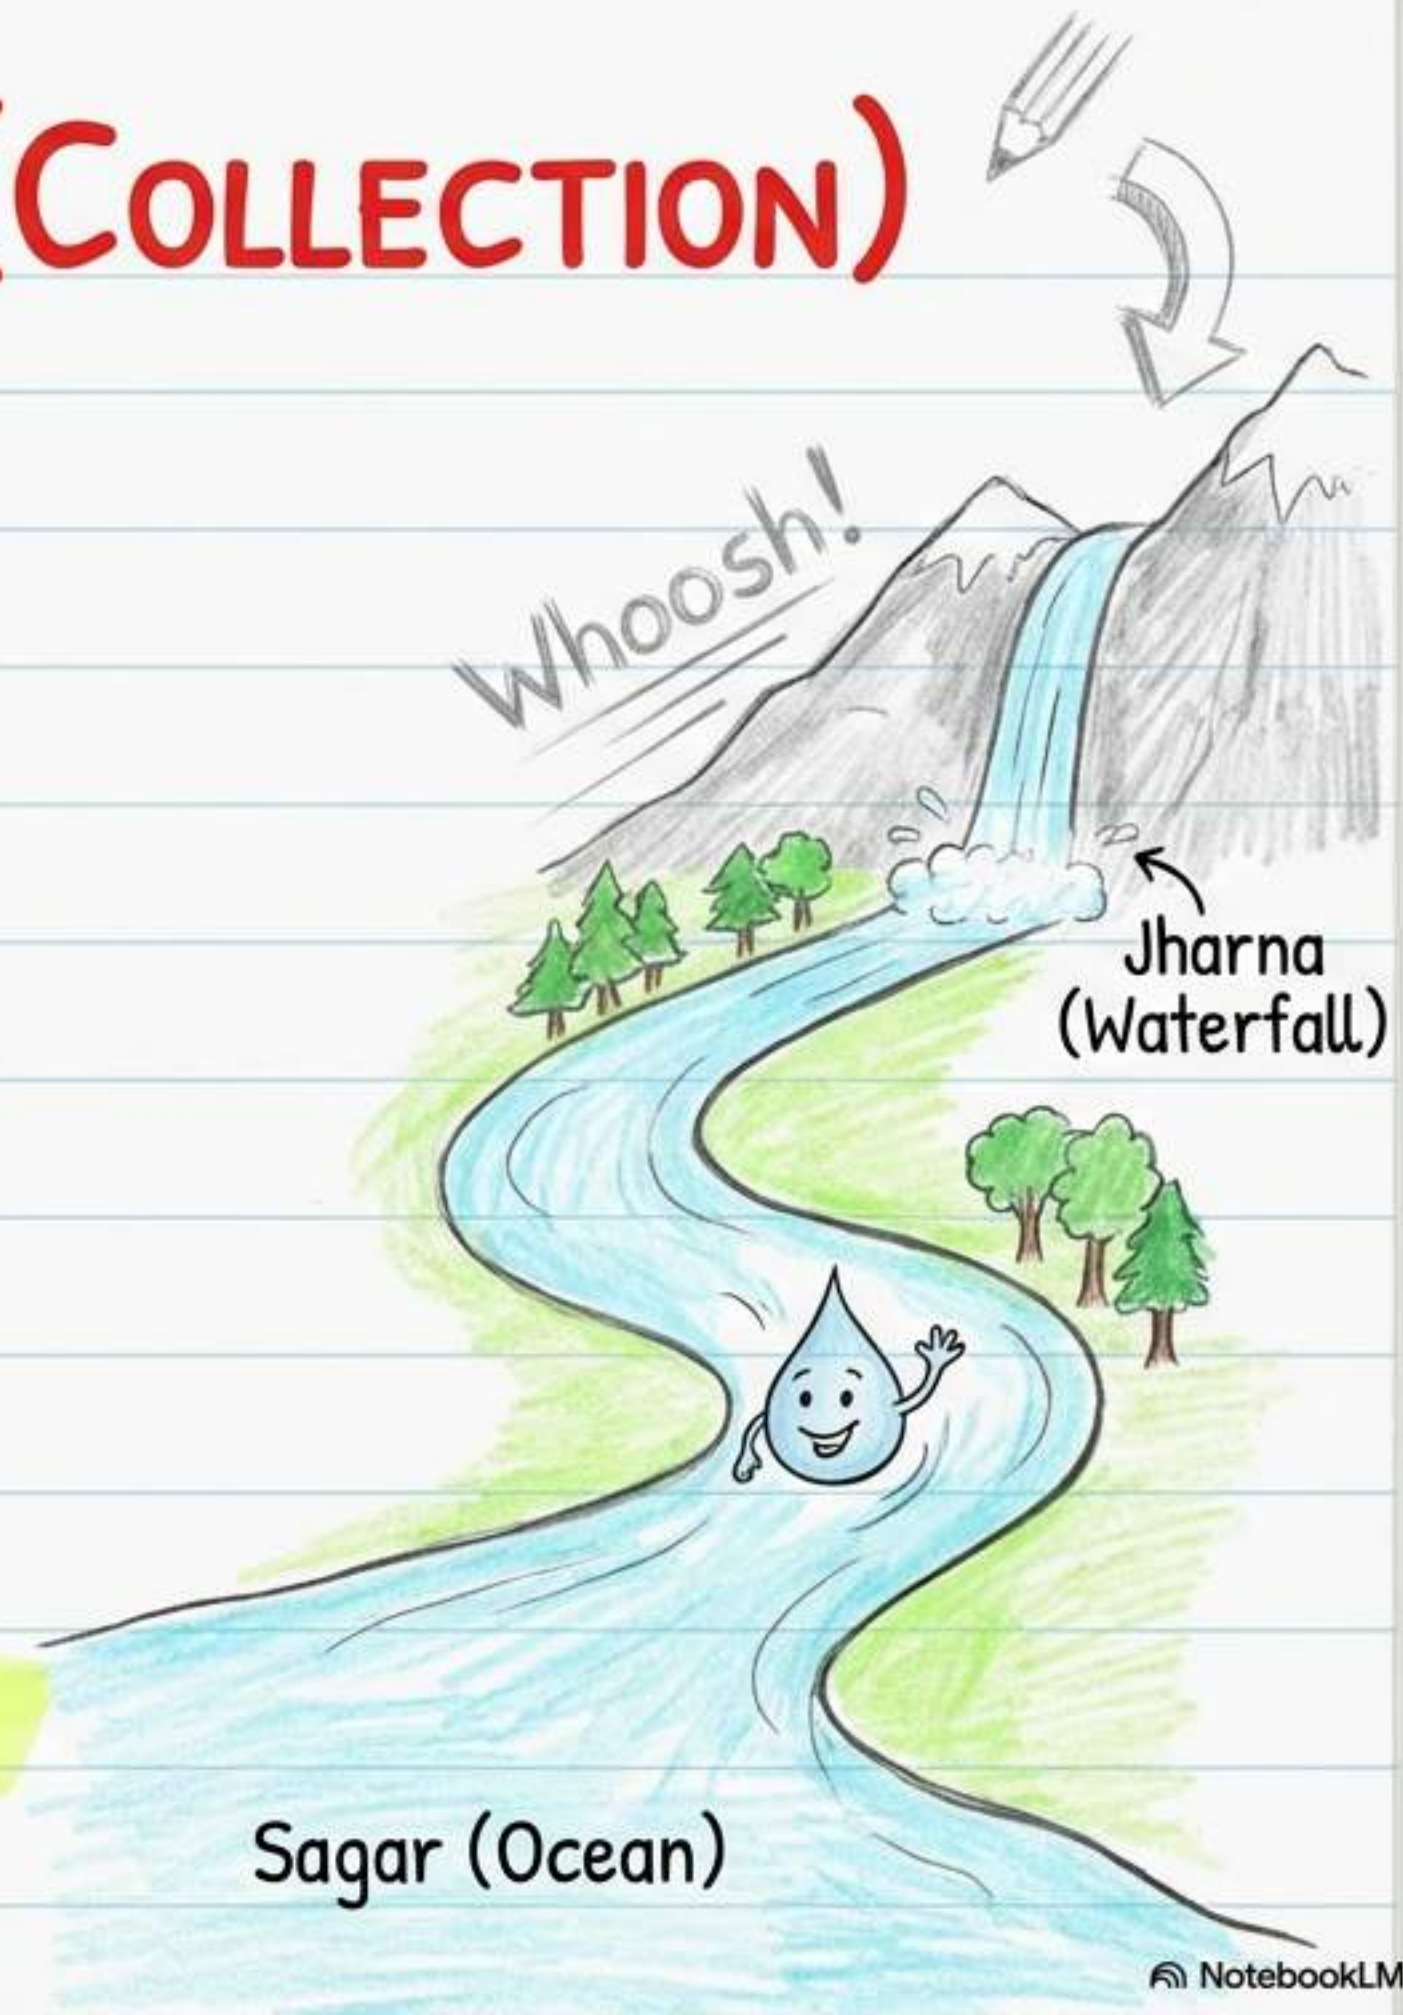

When clouds get too heavy, water falls down. This is Rain.
Scientific name: Precipitation.

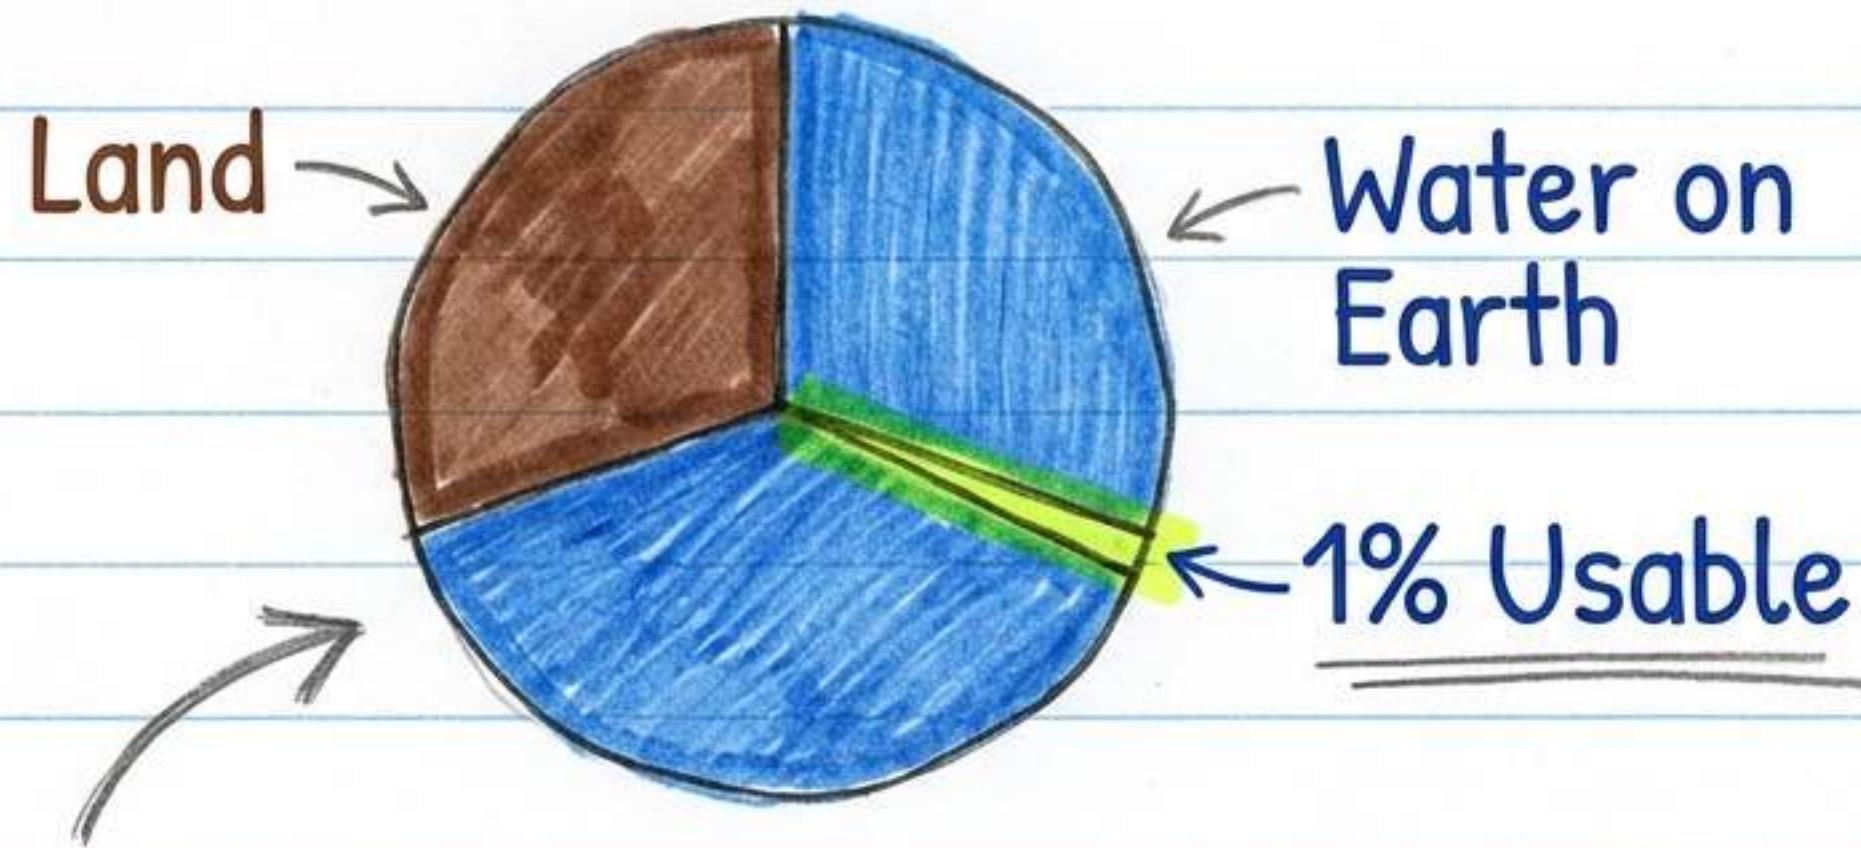

PART 5: FLOWING BACK (COLLECTION)

- '**Jharna**' (Waterfall) was 'naughty' and made a lot of noise.
- Boond played with **Jharna** for many days.
- Turning Point: Boond began to miss **Sagar** (The Ocean).

She flowed down the river to meet Sagar again. **The Cycle is Complete!**

IMPORTANT FACTS (DO YOU KNOW?)

Though 70% of Earth is water, only **1%** is available for human use. (Ocean water is salty!)

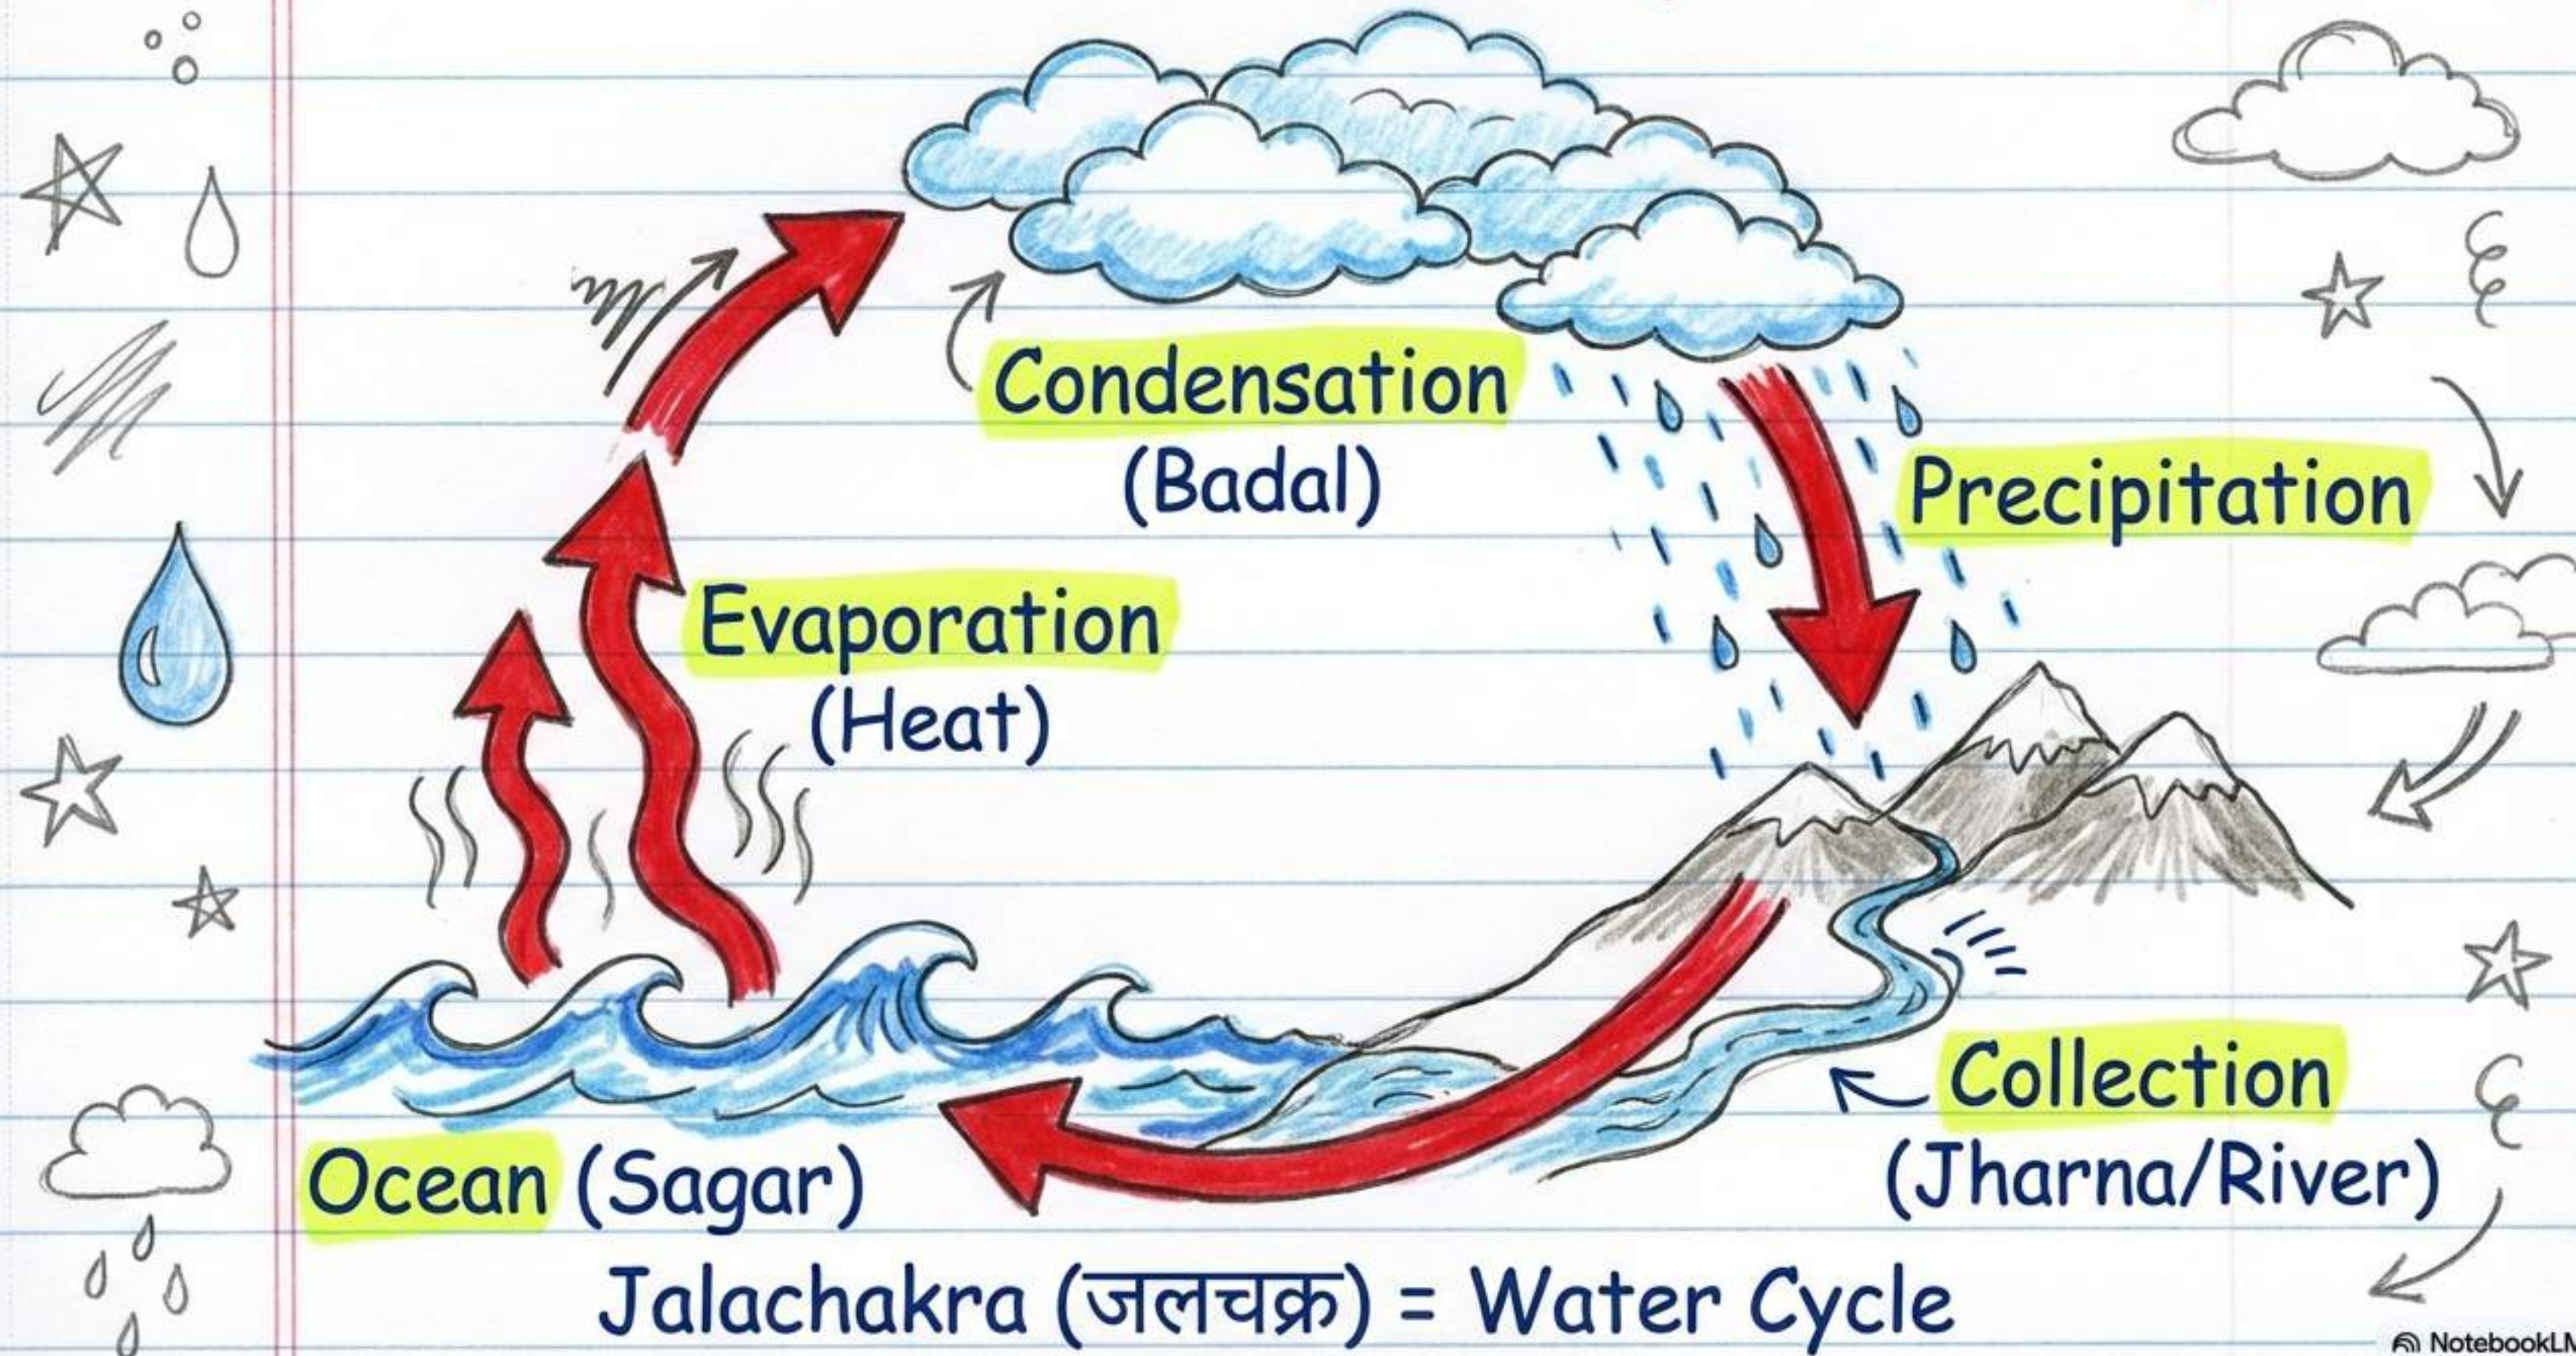

Humans can live **1 Month** without food, but only **1 Week** without water.

Vocabulary:
Exhausted =
Very Tired

TEXTBOOK EXERCISES (SOLVED) ✓

1. When Sun came up, Boond was...?
☒ Playing with Sagar
2. Boond went up to meet his friend Badal because...?
☒ The cloud was much cooler
3. Boond jumped off Badal to play with...?
☒ Jharna
4. Boond and Jharna...?
☒ Played together for many days

THE FULL WATER CYCLE (SUMMARY)

MEMORY TRICK (SUPER IMPORTANT!)

S Sagar / Sun (Start) 

C Clouds (Condensation) 

R Rain (Precipitation) 

O Ocean (Return) 

Sun makes it hot (Evaporation),
Clouds make it cool (Condensation),
Rain falls down (Precipitation),
River fills the pool (Collection)!

LAST MINUTE RECAP

Water Sources: Lake, Well, River, Sea

Process: Ocean → Vapor → Cloud → Rain → River → Ocean

Vocab: Exhausted = Tired 😞

Stat: Only 1% water is usable. Save Water! 

Paani (पाणी) = Water 	Waaf (वाफ) = Vapor 	Paaus (पाऊस) = Rain 
--	--	---

All the Best
for your Exam!
